Shelton, CT 06484

5/31/96

Dear Mr. Shelton,

Enclosed is the list of the book I published.

In response to your questions, I know nothing about Harry Weatherford allegedly on the roof of the Records building. Penn Jones reported that years ago. Penn was not always dependable.

That whole Roscoe White business is falsified and meaningless. Some of it comes from a novel.

I know nothing about any army or air force officers at the Bethesda morgue the night of the assassination.

I believe that none of these has any assassination relevance.

All the films in which you are interested are covered by copyright and I do not know where copies are available. Bronson's I believe is not available. It does refute what Howard Donahue made up, but so does the Zapruder film.

I have never understood why the Secret Service was silent in response to that fabrications particularly because the state of Hickey's health. He has filed suit.

Robert Groden is among those who have copies of the autopsy film but I know nothing about availability.

Thanks for your letter.

Sincerely,

Harold Weisberg
